

UniSil®

A DIFFERENT KIND OF RELEASE LINER STOCK.

Smooth, glossy supercalendered surface that takes silicone coatings like a dream, including lower coat weights. Strength and density that stand up to die cuts on paper and film facestocks of all kinds. You're going to love UniSil's® versatility and performance.

Introducing the new alternative in release liners. Verso's UniSil®. This is a clay-coated, supercalendered base sheet engineered for a wide range of release liner applications. UniSil® is designed to deliver in end-user applications requiring high-speed label dispensing.

FEATURES:

- Smooth, glossy surface for uniform silicone coverage and excellent continuity at lower silicone coat weights
- Engineered silicone holdout designed for use with solvent, solventless, radiation cured or emulsion silicones
- High apparent density provides the ability to die-cut a wide range of paper and film facestocks
- Printable reverse-side coating design promotes improved print graphics
- Low opacity for automated label dispensing operations

APPLICATIONS:

- Pressure sensitive laminations
- Die-cut pressure sensitive roll label applications using paper and film face stocks

UNISIL® SPECIFICATIONS:

Caliper	mils	2.1	2.4	3.2

Verso Corporation is a leading American owned and operated producer of graphic, specialty and packaging paper and market pulp, with a long-standing reputation for quality and reliability. Verso's graphic paper products are designed primarily for commercial printing, advertising and marketing applications, including direct mail, catalogs, corporate collateral, books and magazines. Verso's specialty paper products include release liner papers and label face stock for pressure sensitive, glue-applied and laminate applications. Verso produces packaging paper used in select box applications and point-of-purchase displays. Verso also makes market pulp used in printing, writing, specialty and packaging papers, facial and toilet tissue, and paper towels. For more information, visit us online at versoco.com.
